Mail Stop Patent Application
Commissioner for Patents
P.O. Box 1450
Alexandria VA 22313-1450

1. ☒ Fee Transmittal Form (e.g., PTO/SB/17)
(Submit an original and a duplicate for fee processing)
2. ☐ Applicant claims small entity status.
See 37 CFR 1.27.
3. ☒ Specification [Total Pages 21]
(preferred arrangement set forth below)
- Descriptive title of the invention
 - Cross Reference to Related Applications
 - Statement Regarding Fed sponsored R & D
 - Reference to sequence listing, a table, or a computer program listing appendix
 - Background of the Invention
 - Brief Summary of the Invention
 - Brief Description of the Drawings (if filed)
 - Detailed Description
 - Claim(s)
 - Abstract of the Disclosure
4. ☐ Drawing(s) (35 U.S.C. 113) [Total Sheets _____]
5. Oath or Declaration [Total Sheets _____]
- a. ☐ Newly executed (original or copy)
- b. ☒ Copy from a prior application (37 CFR 1.63(d))
(for continuation/divisional with Box 18 completed)
- i. ☐ DELETION OF INVENTOR(S)
Signed statement attached deleting inventor(s)
name in the prior application, see 37 CFR
1.63(d)(2) and 1.33(b).
6. ☐ Application Data Sheet. See 37 CFR 1.76

7. ☐ CD-ROM or CD-R in duplicate, large table or
Computer Program (Appendix)
8. Nucleotide and/or Amino Acid Sequence Submission
(if applicable, all necessary)
- a. ☐ Computer Readable Form (CRF)
- b. Specification Sequence Listing on:
- i. ☐ CD-ROM or CD-R (2 copies); or
- ii. ☐ Paper
- c. ☐ Statements verifying identity of above copies

ACCOMPANYING APPLICATION PARTS

9. ☐ Assignment Papers (cover sheet & document(s))
10. ☐ 37 CFR 3.73(b) Statement of Power of Attorney
(when there is an assignee)
11. ☐ English Translation Document (if applicable)
12. ☐ Information Disclosure Statement (IDS)/PTO-1449
Copies of IDS Citations
13. ☐ Preliminary Amendment
14. ☒ Return Receipt Postcard (MPEP 503)
(Should be specifically itemized)
15. ☐ Certified Copy of Priority Document(s)
(if foreign priority is claimed)
16. ☐ Nonpublication Request under 35 U.S.C. 122
(b)(2)(B)(i). Applicant must attach form PTO/SB/35
or its equivalent.
17. ☐ Other: _____

18. If a CONTINUING APPLICATION, check appropriate box, and supply the requisite information below and in the first sentence of the specification following the title, or in an Application Data Sheet under 37 CFR 1.76:

☒ Continuation ☐ Divisional ☐ Continuation-in-part (CIP) of prior application No.: 09/889,875, 07/20/2001

Prior application information:

Examiner K. Wyrozowski Lee

Art Unit: 1714

For CONTINUATION OF DIVISIONAL APPS only; The entire disclosure of the prior application, from which an oath or declaration is supplied under Box 5b, is considered a part of the disclosure of the accompanying continuation or divisional application and is hereby incorporated by reference. The incorporation can only be relied upon when a portion has been inadvertently omitted from the submitted application parts.

EDMUND ARTHUR FLEXMAN ET. AL. CASE NO.: CL1375USCNT
APPLICATION NO.: UNKNOWN GROUP ART UNIT: UNKNOWN
FILED: CONCURRENTLY HEREWITH EXAMINER: UNKNOWN
FOR: TOUGHENED, HIGH-MODULUS POLYAMIDES
AMENDED TITLE: TOUGHENED HIGH MODULUS MINERAL FILLED
POLYOXYMETHYLENE POLYMERS

PRELIMINARY COMMUNICATION

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

Prior to examination of this application kindly consider the following remarks:

In related Application No 09/889,875 the Examiner issued an Advisory Action mailed February 19, 2004. Applicant would like to make the following observations regarding the points raised in the Advisory Action, and in the interest of further illustrating the patentability of the instant claims.

The Examiner has written that:

"The property studied by the prior art of ASHIM is izod impact of the composition and its tensile strength. In fact applicants own Examples (1&2, table 2) report having Izod Impact that lies squarely in the middle of those disclosed in saturated acids of ASHIMA. Therefor ASHIMA discloses the composition, even if in comparative examples. Present invention teaches izod impact of 1.3 while ASHIMA teaches 1.4, 1.8 and 1.6 in the reference examples 4-1 through 4-3 depicted by the applicants"

The Examiner compares Izod impact values of 1.4 in the present invention with values of 1.4, 1.8, and 1.6 in Aishima. However Applicant's Izod impact values are reported in units of **ft-lb/in**, while Aishima reports values in units of **kg-cm/cm**. The respective units are clearly indicated in the respective tables of the respective documents. It is apparent that such values are not directly comparable, as 1 ft-lb/in is about 0.184 kg-cm/cm. Thus, 1.8 kg-cm/cm is about 0.33 ft-lb/in and 1.4 kg-cm/com is about 0.26 ft-lb/in. 1.3 ft-lb/in is therefore

significantly larger than the Izod impact strengths disclosed by Aishima in reference examples 4-1 through 4-3.

Furthermore, the reference examples 4-1 through 4-3 of Aishima are **polyethylene** compositions containing **calcium carbonate** (see col. 8, line 62 - col. 9 line 2; col. 6, line 63 - col. 7, line 23 (and in particular line 10); and Table 1) while examples 1 and 2 in Table 2 of the present invention are **nylon 6** containing **titanium dioxide**. The examiner has stated that "ASHIMA discloses the composition, even if in comparative examples" when, in fact, Aishima has not done this. Applicant contends that there is no reason for one to expect polyethylene and nylon compositions to have comparable Izod impact strengths, and respectfully submits that comparisons between them are not appropriate.

The benefit of Applicant's invention is the improvement in stiffness and impact resistance provided by the addition of the claimed mineral fillers to nylon 6, nylon 66, or a mixture thereof in the presence of a saturated organic acid (or salt thereof) over compositions that do not contain the saturated organic acid. This improvement is amply shown in the examples. Aishima, on the other hand, discloses that certain improved mechanical properties can be obtained from compositions comprising a thermoplastic and an inorganic filler "having been prepared by effecting reaction between an inorganic material [...] and [...] at least one unsaturated aliphatic or aromatic carboxylic acid having from 3 to 11 carbon atoms" (abstract). Reference examples 4-1 and 4-2 of Aishima show that the use of saturated organic acids do not provide the same benefit.

The examiner has also written that:

"In addition to the above the prior art of Metzemacher teaches the equivalents of the unsaturated and saturated fatty acids in col. 2, lines 32-45), which would render even more obvious to utilized saturated fatty acid of Metzemacher in the composition of ASHIMA."

Metzemacher discloses "a surface-modified filler composition [...] for flameproofing polymers" (col. 1, lines 6-7). Metzemacher does not teach that the filler composition improves the mechanical properties of polymers. It is respectfully submitted that one would have had no motivation to use the fatty acids disclosed in Metzemacher in the compositions of Aishima to provide a composition with improved mechanical properties, particularly since Aishima explicitly teaches that saturated acids do not work.

Favorable consideration of the instant claims in view of the above remarks is respectfully solicited.

Respectfully submitted,

WILLIAM H. HAMBY
